

Sangha Desktop Access with More Features

Date : April 14, 2022

Dear Vajra Family,

Did you know that you can use many features of the Sangha App directly on the web, FROM YOUR PC? We've expanded these features, which are available now:

- Direct messaging to all Sangha users
- Convenient posting to group chats called Channels
- Adding and scheduling events
- A web version of the Tibetan calendar 'Alendar'
- Easy email verification with a code in push notification

To access Sangha Web, log in with your Sangha App email on your computer:

[DESKTOP ACCESS](#)

Supported on the latest versions of the popular browsers: Mozilla Firefox, Google Chrome, Safari etc.

We are also constantly working to improve the Sangha App itself to make it perfect. In the latest version of the app, which we are releasing just these days, you will find:

Creation of an event that takes place both on-site and is also streamed online

Universal search bar on the home screen with results for Events, People, and Places

New icon placement on the home screen

Push notifications 1 hour before all of your events

Thank you for being present and active, for our common evolution.

With Love,

Sangha App Team
